## PROFESSIONAL SUMMARY

---

Highly motivated Full Stack Developer with hands-on experience in building web applications using Java, React, Python, and SQL. Experienced in developing responsive UIs, and integrating AI solutions using Flask and Gemini API. Proficient in backend development with Java technologies including JDBC, JEE, JSP, and MySQL. Experienced in working in Agile environments, version control, and debugging. Completed real-time project-based training at TAP Academy with a focus on modern web technologies and Java backend development.

## EDUCATION

---

**Visvesvaraya Technological University - KVG College of Engineering**

Nov 2021 – June 2025

*BE in Computer Science and Engineering. CGPA: 7.84*

- **Relevant Coursework:** Data Structures and Algorithms, Database Management, Software Engineering and more.

## TECHNICAL SKILLS

---

**Programming Languages:** Java, Python, SQL

**Web and Backend Technologies:** HTML, CSS, JavaScript, React, Tailwind CSS, Flask, JSP, JDBC, Java EE, MySQL

**Frameworks and Libraries:** Hibernate, TensorFlow, OpenCV, Pandas

**Tools and Platforms:** Git, GitHub, Postman

## PROJECT EXPERIENCE

---

**Coconut Tree Disease Detection System** | *Python, CNN, OpenCV, Django, MySQL*

- Built a deep learning-based image classification system using Convolutional Neural Networks (CNN) to detect four major coconut tree diseases: Eriophyid Mite, Rhinoceros Beetle, Rugose Spiraling Whitefly, and Red Palm Weevil.
- Integrated the trained model with a Django web application, allowing users to upload tree images and receive real-time disease predictions with high accuracy.
- Optimized image preprocessing and inference using OpenCV to ensure rapid prediction and display on the frontend interface.
- Achieved a seamless full-stack integration with MySQL for storing user history and feedback to enhance continuous improvement.
- **Project Link:** [github.com/Dilraj-m-r/Coconut-tree-disease-detection-using-deep-learning](https://github.com/Dilraj-m-r/Coconut-tree-disease-detection-using-deep-learning)

**Food Delivery Web Application** | *Java, JSP, Servlets, JDBC, MySQL*

- Built a full-stack food delivery web application implementing the MVC architecture and DAO design pattern for clean and scalable code.
- Developed features including user authentication, restaurant listings, dynamic menus, cart system, and order management with real-time database integration.
- Integrated admin functionalities for managing restaurants, menus, and orders, ensuring a complete end-to-end solution.
- Deployed the project on Apache Tomcat with MySQL backend, ensuring smooth performance and responsive UI across devices.

## INTERNSHIP EXPERIENCE

---

**Tap Academy, Bengaluru**

May 2025 – Jan 2026

*Java Full Stack Development Intern*

- Working on full-stack web projects using Java, Spring Boot, JSP, and Hibernate.
- Developed modular components using HTML, JavaScript, and integrated backend via MySQL.
- Participated in Agile sprints and peer code reviews for continuous delivery.

**Rooman Technologies Pvt. Ltd.**

Sep 2024 – Feb 2025

*AI – Machine Learning Engineer Intern*

- Delivered an IBM-certified project on Customer Journey Analysis using K-Means Clustering and PCA.
- Built ML models and dashboards for real-time simulation in a business environment.
- Improved team productivity by contributing to documentation and sprint planning.
